A HUNDRED
**STABBING
KNIVES!**

COULD IT BE ENDOMETRIOSIS?

IT'S TIME TO #SPEAKENDO

ENDOMETRIOSIS

is a chronic and painful disease that affects about **1 in 10 women** of reproductive age, yet many don't know they have it.

COMMON SYMPTOMS OF ENDOMETRIOSIS ARE:

painful
periods

pain with
sex

pelvic pain
in between
periods

If you or someone you know may be experiencing these or other symptoms, speak to a gynecologist.
